PROFESSIONAL SUMMARY

DevOps Engineer with 2.5+ years of experience at AMAZON across cloud operations, infrastructure, and technical support, with hands-on expertise in Terraform/OpenTofu, AWS Kubernetes, Helm, Docker, Jenkins, and CI/CD automation for building and maintaining scalable infrastructure.

TECHNICAL SKILLS

- **Infrastructure as Code:** Terraform, OpenTofu, Jenkins, Github Actions, GitOps(Argo CD)
- **Cloud:** AWS (EC2, EKS, S3, VPC, IAM, RDS, CloudWatch, Security Groups, Load Balancers, Cost Explorer/Budgets), Azure (Basics), Google Cloud Platform (GCP)
- **Containers & Orchestrations:** Docker, Kubernetes (eks), Kustomize, Helm
- **Networking:** VPCs, Routing, DNS, Transit Gateways, Load Balancers, AWS Networking fundamentals
- **Monitoring & Observability:** Prometheus, Grafana, CloudWatch.
- **Programming & Scripting:** Python, linux Shell Script, PowerShell, Bash, Java.
- **Systems & Practices:** Linux, Windows, Version Control (GitHub), Agile/Scrum, Cloud Security & Cost Optimization

WORK EXPERIENCE

DevOps & Infrastructure Engineer Intern

March 2026 – Present

Akiyam Solution Private Limited | Pune

- Managed infrastructure and deployment for **GSA-SIP (GeoSim Intelligence Platform)**, a Kubernetes-based platform running **50+ microservices** across staging and production environments.
- Supported **AWS cloud infrastructure** using **OpenTofu/Terraform, Docker, Helm, and Kustomize** across staging and production.
- Maintained **Jenkins CI/CD pipelines** for code validation, security checks, container builds, and deployment workflows.
- Monitored application and infrastructure health using **Prometheus and Grafana**, investigating logs, alerts, and deployment issues.
- Troubleshoot **infrastructure, networking, CI/CD, and Kubernetes issues**, performing root-cause analysis and documenting resolutions.
- Automated recurring **infrastructure and operational tasks** using scripting and DevOps tooling to improve deployment and troubleshooting workflows.
- Used **Cursor and Claude** to accelerate code understanding, scripting, troubleshooting, and infrastructure tasks, while reviewing and validating outputs before implementation.

Operations Support Associate (Consumer Abuse Prevention)

Jun 2024 – Mar 2026

Amazon Development Center | Pune, India

- Served as a **Subject Matter Expert (SME)**, supporting new hires with process training, knowledge sharing, and guidance on internal workflows.
- Managed high-volume operational queues while maintaining SLA compliance and structured escalation workflows across global marketplaces.
- Investigated recurring processing issues using Root Cause Analysis (RCA) and partnered with cross-functional teams to implement long-term process improvements.
- Used internal monitoring and operational tools to identify processing bottlenecks and reduce high-impact operational risks.

Digital Devices & Alexa Support (D2AS) Associate

Sep 2023 – Feb 2024

Amazon Development Center | Pune, India

- Designed and automated weekly reports using Excel Macros and Pivot Tables, reducing manual tracking effort by 60%.
- Troubleshoot device and software configuration issues, identifying root causes and managing ticket lifecycle in partnership with internal teams for escalations.

TECHNICAL PROJECTS

GreenDot - Ultimate end-to-end DevOps Project

- Designed and implemented an end-to-end DevOps workflow for deploying containerized microservices from source control to a Kubernetes environment.
- Automated application testing, Docker image builds, and image publishing using GitHub Actions.
- Provisioned and managed cloud infrastructure using Terraform, following Infrastructure as Code practices for repeatable deployments.
- Deployed containerized services to Kubernetes with health checks, service configuration, and rolling-update strategies.

- Implemented Prometheus and Grafana monitoring to track application and infrastructure health.
- Maintained application and infrastructure configurations using Git/GitHub with version-controlled deployment workflows and documentation.
- Packaged and modified a Helm chart to parameterize environment-specific values, eliminating hand-edited manifests per environment.

PulseRDS — Cost-Aware Database Operations

- Provisioned RDS via Terraform (Infrastructure as Code) and performed a live parameter group change plus a minor version upgrade, validating connectivity and query behavior before and after.
- Configured AWS Cost Explorer on Multi-region deployment and Budgets against the account and used several days of real spend data to identify an oversized, underutilized instance as a rightsizing opportunity, connecting infrastructure decisions to their cost impact.
- Wrote a Python/Bash script to automate scheduled RDS snapshots and endpoint health checks, replacing a manual operational task.

EDUCATION

Master of Computer Applications (MCA)

Sep 2024 – May 2026

MES's Institute of Management and Career Courses (IMCC), Pune | GPA: 8.92 / 10.0

Bachelor of Business Administration in Computer Applications (BBA-CA)

Aug 2020 – May 2023

Brihan Maharashtra College of Commerce (BMCC), Pune | GPA: 7.75 / 10.0

ACHIEVEMENTS & CERTIFICATIONS

- **TechnoFest 2025 Winner (Project Presentation):** 1st place at Sarhad College for the architecture and technical operations of the TravVO application.
- **Amazon Bug-Bust (2nd Runner-Up):** Identified and resolved 17 system bugs during Amazon's annual month-long Bug-Bust event.
- **Amazon Exceptional Trainer Award (Q3):** Commended for outstanding training delivery and operational impact.
- **VOIS GirlsInSTEM Program** — Selected for and successfully completed an HTML/CSS Web Development course, gaining hands-on skills in building and styling responsive web pages.
- **Quality Excellence Award (Amazon):** Achieved a 98% quality score benchmark while supporting global stakeholders.
- **Certifications:** AWS Certified Cloud Practitioner (CLF-C02 – Ongoing), IBM Data Science Professional Specialization, Amazon Skill Builder.
